

## Comments from Implementers on the Impact of Ferret and Groot in Siva's thesis

### DNS OARC Comments on Ferret

"This is awesome, thank you for this work, and thank you for your very clear bug reports, both to us (PowerDNS) and to other projects."

"I was not kidding about the excellent bug reports, by the way.."

— Peter Van Dijk (Senior PowerDNS Developer)

"I was skeptical because I thought – why should I believe his tests, but he proved them by running against so many DNS servers through them"

"So, possibly new RFCs should come with their own logic diagram which can be used to generate the tests"

— Vicky Risk (Director of Marketing, ISC Bind) And Pael Hauffman (IETF & ICANN)

[DNS-OARC Tweet](#) — "Incredible reception from the audience on @SivaKesavaRK presentation. The automation tool received great compliments from the DNS experts"

[Tweet from one of the audience](#) — "As usual for DNS-OARC, #OARC35 is packed with interesting, useful DNS stuff. This one sounded impossible before the talk."

### GRoot Mentions:

[APNIC Tweet](#) — DNS engineers have a new #opensource Guardian to help them catch bugs and prevent DNS-related outages,

[APNIC Tweet](#) — Zone file errors are all over the #DNS. With billions of potential queries, how can you check before deployment?,

[APNIC Tweet](#) — Bugs are everywhere in #DNS zone files. GRoot roots them out.
