

Comments from DNS Community

FERRET

“**This is awesome**, thank you for this work, and thank you for your very clear bug reports, both to us (PowerDNS) and to other projects.”

“I was not kidding about the **excellent** bug reports, by the way..”

— Peter Van Dijk
(Senior PowerDNS Developer)

FERRET

“I was skeptical because I thought – why should I believe his tests, but **he proved them** by running against so many DNS servers through them”

“So, possibly new RFCs should come with their **own logic diagram** which can be used to generate the tests”

— Vicky Risk
(Director of Marketing, ISC Bind)
And
Pauel Hauffman
(IETF & ICANN)

Replying to @dnsoarc @SivaKesavaRK and @UCLAengineering

Incredible reception from the audience on @SivaKesavaRK presentation. The automation tool received great compliments from the DNS experts
